Profile

Software Engineer with a Master's degree in Artificial Intelligence from the University of Murcia. Experienced as a Research Assistant (PDI) at UMU's Faculty of Computer Science in software development, management, and Linux server infrastructure. Combining a strong engineering foundation with problem-solving skills and software development. Actively seeking software development positions to leverage my technical expertise and versatility.

Skills

Languages & Web:	Python, Java, HTML, CSS
Databases:	SQL
Systems & DevOps:	Linux (Server Administration), Git
Libraries & AI:	Machine Learning, Deep Learning, NLP
Languages:	Spanish (Native), English (B2)

Professional Experience

Research Assistant (PDI) — *Faculty of Computer Science, University of Murcia*
Software development, web development, and Linux infrastructure — April 2025 – August 2026 | Murcia, Spain

- Creation and maintenance of the AIKE research group website: `https://www.um.es/web/aike/`
- Development of software solutions for analyzing, processing, and managing complex datasets.
- Design, training, and evaluation of predictive models focused on technical problem-solving.
- Development and PyPI publication of **calm-data-generator**, a Python library for data manipulation and analysis.
- Administration and maintenance of Linux servers for deploying work environments and IT solutions.

Education

Master's Degree in Artificial Intelligence — *University of Murcia*
2024 – 2025 — Murcia, Spain

Bachelor's Degree in Computer Engineering — *University of Murcia*
2020 – 2024 — Murcia, Spain

Featured Projects

Automated News Generator — *Information Extraction and Smart Summarization*
Automated system that collects daily web news and generates concise summaries using local artificial intelligence.

Movie Recommendation System — *Personalized Recommendation Engine*
Content recommendation platform tailored to user preferences with transparent explanations for each suggestion.

Customer Churn Prediction — *Customer Retention and Process Automation*
Tool designed to anticipate customer cancellations and trigger automated alerts for retention strategies.

Coffee Shop Sales Analysis — *Business Intelligence and Dashboarding*
Transformation of raw sales records into an interactive dashboard delivering key revenue insights.

Amazon Spanish Reviews Analysis — *Customer Sentiment Classification and Virtual Assistant*
Customer feedback analyzer detecting user satisfaction and automatically answering common inquiries.

** You can check the details of these projects, along with over 10 additional software development projects, on my GitHub profile.*
