Profile

Computer Engineer with a Master's degree in Artificial Intelligence from the University of Murcia. Experienced as a research assistant (PDI) at Faculty of Computer Science in UMU, working with complex biological datasets, administering Linux server infrastructure, and collaborating on academic research. Proficient across the entire data lifecycle: problem understanding, data cleaning, modeling, and clear communication of results. Actively seeking professional opportunities in the technology industry.

Skills

Tools:	Pandas, NumPy, Matplotlib, Seaborn, Metabase, Excel
Technologies:	Python, Machine Learning, Deep Learning, Natural Language Processing (NLP), Predictive Modeling, MLOps
Databases:	SQL, ETL Processes (Data Cleaning and Transformation)
Languages:	Spanish (Native), English (B2)

Professional Experience

Research Assistant (PDI) <i>Handling biological data, Linux infrastructure, academic research collaboration</i> Murcia, Spain	<i>Faculty of Computer Science, University of Murcia</i> April 2025 – August 2026
--	--

- Management, processing, and analysis of complex biological datasets, ensuring quality and methodological rigor.
- Generation of synthetic data using Deep Learning libraries.
- Maintenance of Linux servers.
- Collaboration in academic research environments and development of open-source libraries.

Education

Master's Degree in Artificial Intelligence 2024 – 2025	<i>University of Murcia</i> Murcia, Spain
Bachelor's Degree in Computer Engineering 2020 – 2024	<i>University of Murcia</i> Murcia, Spain

Featured Projects

Automated News Generator Web scraping, orchestration, local summarization using LLM models, and self-hosted deployment.	<i>Python, LLMs</i>
Movie Recommendation System Comparison and explanation of three distinct recommendation approaches, avoiding "black box" systems.	<i>Recommendation Systems</i>
Customer Churn Prediction - MLOps Complete production lifecycle: tracking, orchestration, drift monitoring, automated retraining, and API.	<i>scikit-learn, MLflow, FastAPI</i>
Coffee Shop Sales Analysis Answering 12 business questions using pure SQL, from data cleaning to the creation of an interactive dashboard.	<i>SQL, BI Tools</i>
Amazon Spanish Reviews Analysis (NLP & RAG) Sentiment classification and RAG system within the same corpus, featuring formal A/B testing between a base model and a fine-tuned transformer.	<i>Transformers, NLP</i>

* You can check the details of these projects, along with over 10 additional projects on Machine Learning and Data Analysis, on my GitHub profile and web portfolio.

Open Source

calm-data-generator Python library for tabular synthetic data generation. Wraps multiple generation engines, simulates concept drift, and produces automated data quality reports.	<i>PyPI Library</i>
