Profile

Computer Engineer with a Master's degree in Artificial Intelligence from the University of Murcia. Experienced as a researcher (PDI) at the Faculty of Computer Science (UMU), carrying out the processing of complex data, predictive model development, and Linux infrastructure management. Proficient across the entire data lifecycle: processing, modeling, automation, and clear communication of insights to stakeholders. Actively seeking software development and data roles in the tech industry.

Skills

Tools:	Pandas, NumPy, Matplotlib, Seaborn, Metabase, Excel
Technologies:	Python, Machine Learning, Deep Learning, Natural Language Processing (NLP), Predictive Modeling, MLOps
Databases:	SQL, ETL Processes (Data Cleaning and Transformation)
Languages:	Spanish (Native), English (B2)

Professional Experience

Research Assistant (PDI) Data analysis, predictive modeling, open-source development, and Linux infrastructure Murcia, Spain	<i>Faculty of Computer Science, University of Murcia</i> April 2025 – August 2026
---	--

- Thorough analysis, processing, and management of complex datasets to extract key business and technical metrics.
- Design, training, and evaluation of predictive models focused on solving complex technical challenges.
- Development and PyPI publication of **calm-data-generator**, a Python library for data manipulation, generation, and analysis.
- Administration and maintenance of Linux servers for deploying IT solutions and development environments.

Education

Master's Degree in Artificial Intelligence 2024 – 2025	<i>University of Murcia</i> Murcia, Spain
Bachelor's Degree in Computer Engineering 2020 – 2024	<i>University of Murcia</i> Murcia, Spain

Featured Projects

Automated News Generator Automated system that collects daily web news and generates clear summaries using local artificial intelligence.	<i>Information Extraction and Smart Summarization</i>
Movie Recommendation System Content recommendation platform tailored to user preferences with transparent explanations for each suggestion.	<i>Personalized Recommendation Engine</i>
Customer Churn Prediction Tool designed to anticipate customer cancellations and trigger automated alerts for retention strategies.	<i>Customer Retention and Process Automation</i>
Coffee Shop Sales Analysis Transformation of raw sales records into an interactive dashboard delivering key insights on revenue and top products.	<i>Business Intelligence and Dashboarding</i>
Amazon Spanish Reviews Analysis Customer feedback analyzer detecting user satisfaction and automatically answering common inquiries.	<i>Customer Sentiment Classification and Virtual Assistant</i>
